

PBCRun is an independent, unofficial guide. Not affiliated with, endorsed by, or sponsored by the Pebble Beach Concours d'Elegance, Pebble Beach Company, or any official Car Week organizer.

MOBILE APPLICATION — CONFIRMED MVP PLAN

PBCRun

A visitor's guide to every event of Car Week — official and satellite, free and ticketed — with the competing cars laid out by show, and a simple personal log of what you've been to.

01 — CALENDAR

Every event, with descriptions

02 — CAR LISTS

Directory + spotted feed

03 — PROFILE

Personal check-in log

FEATURES

TIMELI

01 / Overview

Three features, confirmed — nothing extra

No auxiliary-event organizing, no messaging, no social layer. This is a guide app for someone flying in for Car Week who wants to know what's on, what's

competing, and to keep their own record of the week.

CALENDAR Every event, Aug 7–16 Free / ticketed tag on each Full description per event Add to device calendar	CAR DIRECTORY Programmed shows only Class-filterable Basics for every car Description where one exists
SPOTTED Wildcard shows (Lemons, etc.) Live, user-posted No pre-built roster Photo + short caption	PROFILE Check in at any event Personal log, private No messaging No public social feed

02 / Information Architecture

Sitemap

Four tabs. "Cars" is one tab with two internal modes — Directory and Spotted — since they're the same object (a car) shown two different ways depending on whether the show publishes an entrant list.

AT A WILDCARD SHOW CONCOURS D'LEMONS, STREET SHOWS

MVP vs. Phase 2

Full Calendar	Every Car Week event, Aug 7–16, official and satellite, with descriptions
Free/Ticketed Tags	Clear label on every event so cost is never a surprise
Save + Device Calendar	Bookmark events, export to phone calendar
Car Directory	Programmed-show entrants, class-filterable, basics + description where one exists
Spotted Feed	Live, user-posted cars for wildcard shows with no pre-built roster
Check-In	One tap per event, private to the user
Personal Log	Chronological record of everything checked into that week
Non-Affiliation Notices	Onboarding, guide screens, app store listing

PHASE 2 — EXPLICITLY DEFERRED

Messaging	Deliberately cut from MVP — revisit only if there's real demand
Public Social Feed	Spotted stays functional, not social, for now
Push Notifications	"Starting soon" alerts for saved events
Photo Galleries	Multiple photos per car, not just one
Multi-Year Archive	Past years' entrant directories and Best of Show history
Offline Mode	Cached calendar and directory for spotty peninsula signal

CUT FROM EARLIER DRAFTS

Auxiliary-event organizing tools, RSVP/ticketing for third-party meetups, in-app messaging, and any "official" voting or judging feature — all removed to keep this a guide, not a platform, and to stay clearly on the unofficial side of the line.

06 / Launch Timeline

14-day sprint

Calendar data collection starts Day 1, since it's the backbone every other screen depends on.

WEEK 1	Data & Core Build
Day 1	Compile the calendar dataset All events, Aug 7-16Free/ticketed taggedDraft descriptions
Day 2	Compile programmed-show entrant lists Concours, Quail, Concorso Italiano
Day 3	Build: Home + Calendar Grok prompt sprintNav shell
Day 4	Build: Event Detail + Save/Device Calendar
Day 5	Build: Cars — Directory mode Class filters
Day 6	Build: Cars — Spotted mode Photo postLive feed
Day 7	Internal review checkpoint

Day 7	Walk both Car modes Cut/adjust scope
WEEK 2	Profile, Test & Launch
Day 8	Build: Check-in + Personal Log
Day 9	Disclaimer & onboarding copy pass Non-affiliation language everywhere it's needed
Day 10	Polish pass Empty/error states Missing-description handling
Day 11	QA + submit to app review iOS + Android
Day 12	Content freeze Final calendar & directory lock
Day 13	Field test Check-in and Spotted post, tested live
Day 14	Public launch Store listing live Ahead of Aug 7 kickoff
